TOP GUN SCHOLAR

WILL PROVIDE. . .

40 thousand books. . .

completely indexed

At your beck and call in a

SPLIT SECOND!

IMAGINE...

In the field of academia. . .

Raising your grades from a C to an A in a matter of months, by referencing indexed materials and books in unbelievable time!

Professors and students at various universities have successfully used the Top Gun Scholar program and its approach to studying. Examinations improved and the student's learning experiences showed dramatic results.

Actual student results...

One of the founders of this corporation took five classes at Yavapi College in Prescott AZ and tested the indexing system process. This was a full load of classes over two semesters with work requirements from five different professors. A summary of the results of using the process is provided below.

- **Humanities class:**

Dieter Bartels. PhD, was impressed with the process and recommended it to his students. A perfect score of 100% was achieved in Humanities 241 and 242 and a special award for leadership was given to the founder for providing the class with the same tools he used.

- **Business law class:**

This is BSA 237 Legal Environment Business class. Professor Lovell, PhD, adopted the process for all his students and gave the founder an A for the online work.

- **Computer class:**

The founder got an A in this class with a score of missing only seven questions out of over 700 test multiple choice questions Professor . Rebecca Singleton examined the process and thought it would fit in any college or university level class.

- **English Composition:**

Professor Michelson gave an A in this class and was involved in the process.

IMAGINE...

In the field of science. . .

Information and data, all indexed, in less than a second! Thousand of hours and dollars can be saved by using the Top Gun Scholar Process.

IMAGINE...

In the world of religion

- Having the entire Bible totally indexed by word and verse... there in seconds for all religious scholars!

IMAGINE...

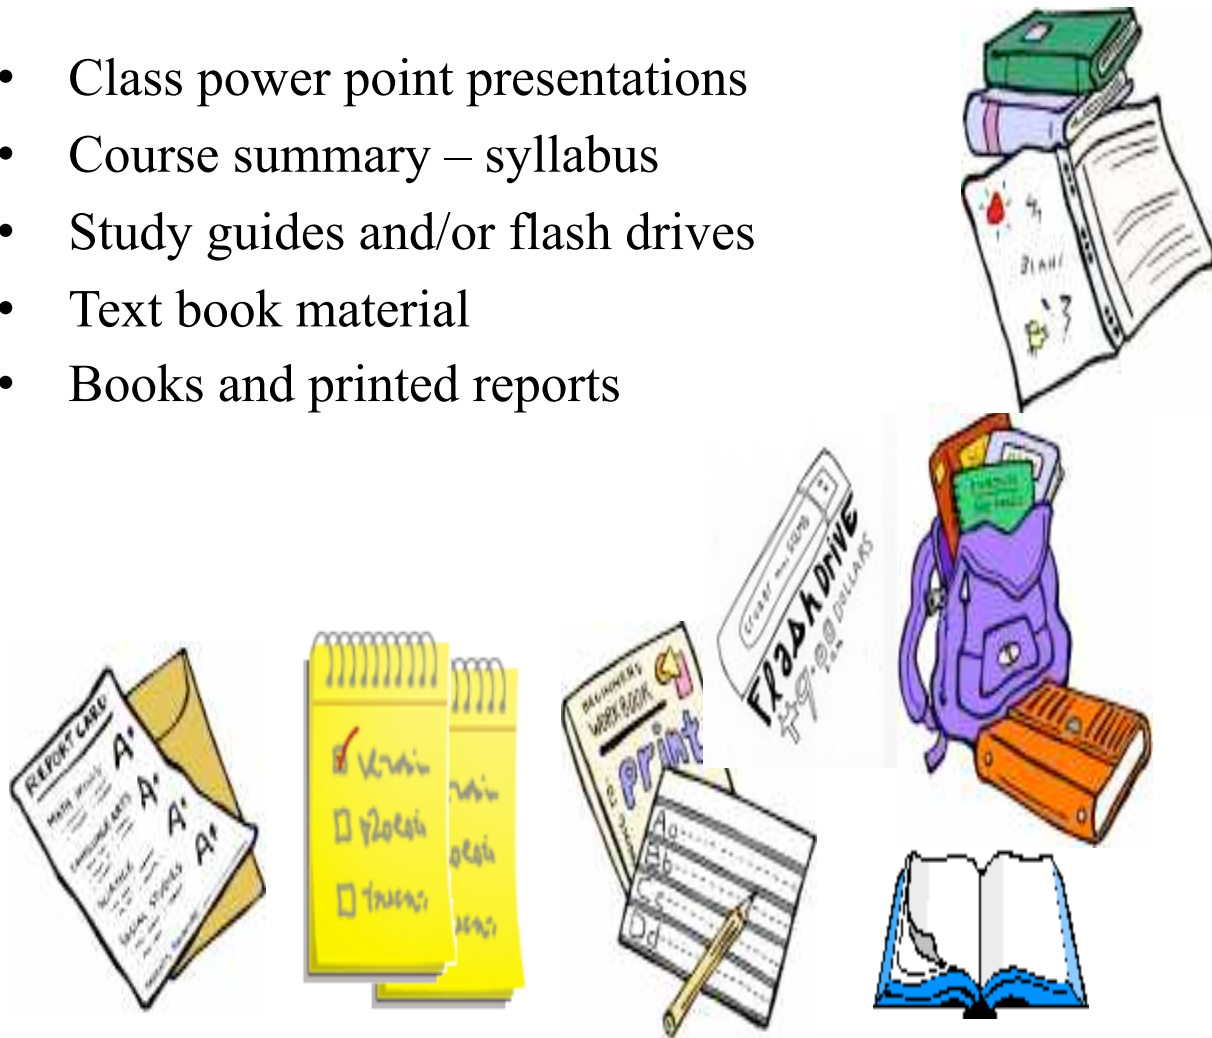

**Your child's favorite story or lesson . . . there to read
with one click of your computer!**

**The Top Gun Scholar program will be a dream come
true to all those who home-school. Robinson Crusoe
will be there on their door step!**

Digital Material

- Class power point presentations
- Course summary – syllabus
- Study guides and/or flash drives
- Text book material
- Books and printed reports

Flash drive = 60,000 books

USB flash drives offer advantages over other storage devices, particularly the floppy disk.

1	USB connector
2	USB mass storage controller device
3	Test points
4	Flash memory chip
5	Crystal oscillator
6	LED
7	Write-protect switch (Optional)
8	Space for second flash memory chip

Indexing results

Screen shots for Hammurabi code featuring the results using only class notes and then using our library.

ALL THIS IS POSSIBLE. .

After reading about our program, the most asked question is, “Why not just use Google or Wikipedia”

The answer is..... Google has 500,000 plus servers, indexing 100 million web sites. This means they index everything that comes down the pike that relates to the search. You have heard the expression, "cut to the chase". That personifies the Top Gun Scholar process. To sum it all up. . . Top Gun Scholar provides blinding speed, germane accurate results and copyright free information, all superior to other methods. The professors agree.

If your curiosity has been aroused, the easiest way to give you more complete answers is for us to give you a demonstration.

TO ARRANGE FOR A DEMO CALL. . .
